700 PAY TRIBUTE TO DR. SHIELDS WARREN FOR SERVICE TO NATION AND HUMANITY

PARTY POSTER — Mrs. Richard Overholt, right, adds final touch to announcement of Blinstrub's Village benefit to be sponsored by Friends of the Deaconess on April 24 to aid Nurses' Scholarship Fund and purchase hospital equipment. Viewing the colorful message are, left to right, Mrs. Lewis Hurxthal and Miss Dorothy Seccomb. Tickets are still available.

$10,000 B. U. Education Fund Honoring Doctor Established At 60th Birthday Celebration

Scientists and educators, military leaders and business officials, physicians, clergy, editors and friends marked the 60th birthday of Dr. Shields Warren with a dinner of tribute at the Hotel Statler-Hilton on Wednesday, Feb. 26.

Seven hundred persons offered salutes of gratitude and recognition for Dr. Warren's accomplishments for the Deaconess Hospital, for the nation and for all humanity.

A lasting honor was established in the form of a Shields Warren Fund to endow professorships in medical education at Boston University.

Dr. Sidney Farber, scientific director of the Children's Cancer Research Foundation, presented B.U. President Harold C. Case a check for more than $10,000 in honor of Dr. Warren, whose grandfather was the university's first president.

FRIENDS SPONSOR DINNER AND ENTERTAINMENT AT BLINSTRUB'S APRIL 24 TO AID HOSPITAL

The most attractive social offering of the Spring season will take place Thursday, April 24, sponsored by the Friends of the New England Deaconess Hospital.

An opportunity to dine, dance and donate to the Deaconess will lure more than 1200 persons to the famed Blinstrub's Village in South Boston. The Friends and their friends, hospital employees and the medical staff and their wives will enjoy a gourmet's dinner.

Top-flight entertainment, for which Blinstrub's is nationally noted, will highlight the evening of fun. As the Friends express it, the extra gay floor show will be of impeccable taste, "clever enough to interest your youth, discreet enough for grandma."

And dance, if you wish, to an outstanding orchestra. Or relax and enjoy

(Continued on Page 7)

FAMILIES INVITED TO MAY OPEN HOUSE

Mark Tuesday, May 13, and Thursday, May 15, on your calendar!

Open house will be held by the hospital on those dates for families of employees. From 7 to 9:30 in the evening, a program of tours, refreshments and a movie — Mr. Atom Goes to Town — showing the Deaconess will be presented.

The open house will be the feature of Hospital Week and will give the families of employees an opportunity to learn much of interest about the Deaconess. Full details will be announced later.

RECORD SERVICE CITED AT AWARDS DINNER

Deaconess Hospital personnel who in the past year set new records for long-term employment were honored for their loyal service on Wednesday, March 5, at Longwood Towers.

More than 260 guests with five or more years of service enjoyed dinner, dancing and the presentation of awards to 73 employees who reached five-year levels.

Miss Orianna F. Harding received tribute as the employee with longest service — 45 years. Four persons were cited for 30 years, three for 25 years, five for 20 years, six for 15 years, 17 for 10 years and 37 for five years.

Total service represented at the dinner surpassed 3,000 years. In 1957 the total was 2,887 years and in 1956 all service added up to 2,450 years.

Miss Ellen Adams, personnel director, introduced award winners and R. D. Lowry, executive director, made the presentations.

Expressing the gratitude of the Corporation were Francis W. Capper, president, Henry S. Rogerson, treasurer, and John Barnard, Chairman of the Budget Commission.

Other head table guests were Wesley D. Sprague, associate director; Dr. Warren F. Cook, Miss Harding, Henry Flynn, Miss Eva Gifford, Miss Ada W. Hamlyn, Howard Lewis, Herbert C. Robinson, Donald L. Sabine, Miss Ruth A. Sherman, Mrs. Nora Webb and Miss Eva M. Witham.

Award winners and their years of service were:

FIVE-YEAR GROUP — Receiving awards for completing five years of employment are these personnel who were among 37 to achieve the mark.

QUARTER CENTURY — R. D. Lowry, executive director, right, presents citations for 25 years of service to, left to right, Natalie Tompkins, Frederick Cheney and Bertina Terkelsen.

30-YEAR RECORD — R. D. Lowry congratulates, left to right, Donald Sabine, Eva Gifford and Henry Flynn.

Service extraordinary

The birth and life of New England Deaconess Hospital have been seen fully by only one person — Miss Orianna F. Harding. The story of the hospital is, in many ways, the story of her life.

"Newcomers", with between five and 30 years on the scene, were held spellbound at the recent Service Awards Dinner as she delved into rich memories.

She told of many things . . . the deaconesses, of whom she was one, who began their work on Massachusetts Ave. in the late 1800's. . . . the first operating room, illuminated by three gas lights, on the fourth floor . . . the necessity of carrying patients up the four flights.

She recalled objections to the present site because "you can't expect doctors to go into the woods to treat their patients." And she described the boundless joy that has been — and is — hers in extending a hand to the sick from all ends of the earth, in helping Deaconess grow to greatness, in knowing the outstanding physicians in the medical world's finest half-century.

20-YEARS SERVICE — The hospital's honors for two decades of service are presented by R. D. Lowry to, left to right, Edward Gauntlett, Muriel Palmer, Lille Dixon and Temperance Abbott.

15-YEAR GROUP — Executive Director R. D. Lowry is shown with, left to right, Beryl B. Paine, William A. Meissner, M.D., Natalie Fossati, Mary O. Libby, Olive Gates, M.D., Ellen Howland and J. Warren Smith.

DECADE AT DEACONESS — Gratitude of the hospital corporation and administration is extended to this group for 10 years of service.

DINE, DANCE, DONATE!

TICKETS NOW ON SALE

Tribute by Francis W. Capper, President
N. E. Deaconess Hospital, to Dr. Warren

DR. SHIELDS WARREN

In more than 30 years of loyal, dedicated and selfless service on the staff of the New England Deaconess Hospital you have earned the highest honors of your profession, the deepest respect of your nation and the sincerest gratitude of humanity.

Your international prestige has heightened the prestige of your hospital; your leadership, accomplishment and unique abilities in the interrelated fields of medicine, science and education have enabled the Deaconess to share on the highest plane your contributions to humanity.

You established in 1927 the Laboratory of Pathology. Under your direction this laboratory has expanded until today a building devoted entirely to cancer research stands as a monument to your medical genius and administrative skills. The Cancer Research Institute is your battle headquarters where you emphasize the four essential elements in the fight against this disease — diagnosis of cancer, care of the sick patient, control of cancer and pure research.

At the Deaconess Hospital you have pioneered atomic research and the use of radioactive isotopes as tracers in localizing the cancer and treating it. You were among the world's leaders in using radioactive phosphorus in the treatment of Leukemia.

Your naval service during World War II and the honor bestowed upon you by the United States government by appointment as the first Medical Director of the Atomic Energy Commission have been viewed with pride by your hospital associates. Your sacrifice and boundless enthusiasm have developed the Division of Biology and Medicine of the Atomic Energy Commission into a major influence in medical research in the United States. Your willingness to serve whenever and wherever called is demonstrated by your present position as United States representative to the United Nations Scientific Committee on the Effects of Atomic Radiation.

The Hospital shares the glory of your personal awards. To list but a few — the Ward Burdick Award of the American Society of Clinical Pathology, the American Cancer Society Medal for 1950, the William Procter Award of the Scientific Research Society of America, Modern Medicine Award, Banting Medal of the American Diabetes Association, the General Leonard Wood Memorial Award of the Boston City Hospital Alumni Association and the Scientific Products Foundation Award. The achievements they represent have been major factors in elevating your hospital to a position among the world's finest medical centers.

The gratitude and respect of the trustees, the corporation members and the administrative staff of the New England Deaconess Hospital are as limitless, Dr. Warren, as your contributions to your fellow man. Your service has been in the loftiest tradition of humanity's most noble profession.

On this, your 60th birthday, we extend our thanks and our wishes for your continued success and happiness.

700 SCIENTISTS, EDUCATORS AND FRIENDS GIVE TRIBUTE TO DR. SHIELDS WARREN

(Continued from Page 1)

Nurses of the Deaconess Hospital served as hostesses.

Leaders who themselves are renowned in all fields of endeavor hailed the world-famed Deaconess pathologist and radiation expert with two choruses of "Happy Birthday."

The great scope and contribution of his work for the United States was outlined by Admiral Lewis L. Strauss, chairman of the Atomic Energy Commission.

Speaking of Dr. Warren's work with the commission on atomic radiation, he claimed that there is "no one in the United States, or anywhere in the world, who has a greater over-all understanding of the most important subject — the effects of radiation."

He said that during the past few years, Dr. Warren, as chairman of the National Committee on the Pathologic Effects of Radiation "has given freely of his encyclopedic knowledge and his equally great human understanding."

"As a much-consulted consultant to the Atomic Energy Commission," Adm. Strauss continued, "he has contributed importantly to the safe development of our defense efforts in atomic weapons and in nuclear propelled vessels and aircraft."

Dr. Richard B. Cattell, director of the Lahey Clinic, spoke "for the practice of medicine."

Francis W. Capper, Deaconess Hospital president, expressed the hospital's tribute to Dr. Warren for his leadership and accomplishments as scientific director of the Cancer Research Institute.

Former students of Dr. Warren gave their salute through their spokesman, Dr. Sheldon C. Sommers, chief pathologist for the Massachusetts Memorial Hospitals and associate professor of Pathology at Boston University School of Medicine.

Dr. Charles C. Lund, president-elect of the Massachusetts Medical Society and clinical professor of surgery at Harvard Medical School, cited Dr. Warren's work in the fight to achieve cancer control.

Brig. Gen. Elbert DeCoursey, who with Dr. Warren, investigated the effects of atomic radiation on the post-atom bomb population of Japan, spoke for the armed forces and Dr. Robert Moore, dean of the College of Medicine of the State University of New York in Brooklyn, gave honor to his work in medical education and pathology.

Michael T. Kelleher, vice-president of Marsh & McLennan, Inc. and trustee of the Faulkner Hospital, Children's Hospital and the Boston Symphony Orchestra, was chairman of the dinner committee.

Toastmaster was Edward A. Weeks, editor of the Atlantic Monthly.

HERE . . AND THERE

Dr. Albert Renold, speaking at the Greater Boston Diabetes Society's annual meeting, described a new method of measuring amounts of insulin-like material in the blood so small as to be almost beyond imagining. He said he is now using the method at the Baker Clinic Research Laboratory at the Deaconess in an attempt to find what the lack of insulin does to the body and why the diabetic does not manufacture his own insulin.

Miss Muriel H. Lund of the nursing staff has been appointed chairman of the Nurse Enrollment Committee of the Boston Metropolitan Chapter, American Red Cross.

Among 13 eminent judges for the Fifth Science Fair sponsored by the Public School Association of Needham were Dr. John L. Tullis of CRI, judge in the biology category, and Dr. Robert Collins, chemistry judge.

Dr. Tullis also was among the principal speakers at the annual conference of the Massachusetts Safety Council. He outlined how Civil Defense squads trained to speed radiation victims to medical facilities outside Boston could help save thousands of lives in the event of nuclear attack on the city.

Deaconess Hospital was included in the itinerary of 4-H girls participating in the 1958 4-H teen tour in Boston. Scheduled for April 18, the program is planned for 500 girls throughout the state who have a choice of 16 institutions, including the hospital, for career studies.

Mrs. Margery Homer, director of volunteer service, requests that anyone interested in volunteering for diversional therapy work with patients contact her.

EASTER SERVICE HELD ATOP BAKER BUILDING

Chaplain Rudolph L. Samuelson was minister at Sunrise Services held on the roof of Baker Building at 6 a. m. on Easter Sunday.

Nurses, students, employees and patients attended. Mrs. Samuelson was organist.

On Maundy Thursday, a nurses' Vesper Service was conducted by Chaplain Samuelson at 8 p. m. in the Arthur T. Dooley Chapel, with Candle Light Communion.

SPRAGUE AGAIN SECRETARY OF N. E. ASSEMBLY

Deaconess employees had a guiding role in the record-breaking success of the 35th Annual Meeting of the New England Hospital Assembly held March 24, 25, and 26 at the Hotel Statler.

Wesley D. Sprague, associate director of the hospital and secretary of the Assembly, reaped dividends from many weeks of planning and working. He reports that 5719 persons attended the sessions — the highest number in the 35-year history.

He was re-elected to the position of secretary for another term.

Executive Director R. D. Lowry headed an instructional conference on administrative control of X-ray hazards at which Dr. Marks and Mr. Spaulding were the discussants. Discussant at a program on new services was Russell F. Cowing, radiological physicist at the Cancer Research Institute. He spoke on Radio-Active Isotope Service.

At the same session, Dr. James A. Bougas of the Deaconess staff and Overholt Clinic discussed Cardio-Pulmonary Laboratory Service.

Walter Emery, superintendent of Laundry and Grounds was on a panel concerning laundry, linen and housekeeping departments.

Editorially Speaking

Behind the Statistics

Statistics make dull reading — an unfortunate fact.

It is unfortunate because figures, dull in themselves, frequently are delightful in interpretation. Penetration of their boring camouflage can reveal reasons for satisfaction, pride and gratitude.

To be specific, statistics concerning the length of employment of Deaconess Hospital personnel are pleasantly significant.

Nearly one-third of all employees have been associated with the Deaconess for five years or more. These are employees of many divergent talents and duties. No particular category can claim stronger bond than others with the hospital, for they are nurses and dietitians, maintenance personnel and laboratory technicians, pharmacists and engineers and physicians — men and women from all departments.

They share one interest, one loyalty — the New England Deaconess Hospital. Their longevity is evidence of many things: of a desire to serve, directly or indirectly, those who are stricken by illness, of a proven ability to perform their duties well in the job of their choice.

Statistics show that in 1956 long-term employees boasted a total of 2,450 years at their jobs. The score climbed steadily in 1957 to 2,887 years and in 1958 to beyond the 3,000-year mark.

These figures lead to obvious conclusions. They prove that those who have remained for many years at the Deaconess Hospital find pride and satisfaction in their jobs. They disclose that these employees enjoy the sense of accomplishment derived from the collective job performed by all employees who have a role, whatever their specialty, in returning the sick to health.

Their loyalty and personal contribution to the success of the hospital are recognized and appreciated. For this reason, the Service Awards Dinner has grown in importance as an annual milestone.

It is an opportunity for those representing the corporation and administration to offer a sincere "thanks".

And it is an event at which long-term employees say by their record: "Deaconess is a good place to work."

OLDEST BUILDING AT DEACONESS TORN DOWN AS MAINTENANCE UNIT CONSTRUCTION BEGINS

Broadbeck Cottage, a building rich in medical history and oldest structure in the hospital group, is now only a memory.

Employees and staff with recollections of bygone days when the two-story wooden building was the scene of Boston's first insulin injection and other milestones in the study and treatment of diabetes, watched its destruction with nostalgia.

The new maintenance building will soon start rising on the site — now only a hole in the ground. Progress of the project is on schedule and barring delays due to the building trades strike, the completion goal of Jan. 1 will be achieved.

CANCER SOCIETY AND AEC AWARD LARGE GRANTS

Second largest grant in the nation from the Atomic Energy Commission was awarded to Dr. Shields Warren for research at the Cancer Research Institute.

The grant of $225,000 for investigations of acute and chronic radiation injury was the largest of 15 given to New England institutions. The funds, which renew previous grants for one year, will permit continued studies at CRI for the Commission.

A grant of $50,000 from the American Cancer Society was announced this month. This fund will be applied to the construction of a fourth floor on the present CRI building.

Previously, $120,000 was awarded by the U.S. Public Health Service toward the expanded research facilities.

Bids for construction were requested on April 9 and will be opened on April 29. Work is expected to be completed by the end of the year.

Engagements

Fay Anderson, class of 1956, to John R. Rogers

Margaret M. Saunders, staff nurse, to Henry J. Chisholm

Eldena M. Fowke, School of Nursing, to Richard J. Steinberger

Joan M. Welch, staff nurse, to George P. Rice

Toy Har Chin, Research Technician, to Bock Chin

Eleanor Hongisto, School of Nursing, to Wesley E. Lord

Judith A. Burgess, School of Nursing, to Robert L. Braley

Marjorie Jones, Medical Secretary, to Kenneth A. Ball

Dorothy H. Senkowski, dietitian, to Richard M. Amberg

Diane Fellows, staff nurse, to Robert E. McGrath

Barbara A. Burnell, X-ray technician, to Edward W. Millett

Janice Stevenson, School of Nursing, to John R. Booth

Weddings

Gail A. Ferguson, Graduate Nurse, to Rudolf Reimnitz

Beverly V. Legare, Graduate Nurse, to Clifford J. Hatch

Carol A. Sveistys, class of 1956, to Robert G. Sprague

Dorothy A. DeVine, Laboratory Technician, to Jack E. Davis

Benefit April 24

(Continued from Page 1)

the music. The club has been reserved for the Friends of the Deaconess party which will start at 7 p. m. Tickets are $10 per person and every cent of the profit will be applied to the Nurses' Scholarship Fund and to the purchase of much-needed hospital equipment.

Seating arrangements are flexible — as few as two at a table or as many as desired. Your group can sit together.

Dress is formal or informal, whichever you choose.

This is truly an unusual chance to spend a delightful evening and benefit your favorite charity. Come yourself. Bring the family and tell your friends.

Chairman for the event is Miss Dorothy Seccomb, Friends' president.

Committees and their chairmen include, Tickets, Mrs. Lewis Hurxthal; Lists, Mrs. Sheldon Wardwell and Mrs. Allan Joslin; Communications, Mrs. H. Bigelow Emerson; Invitations, Mrs. Eugene Mather; Corresponding Secretary, Mrs. John McKittrick, and Publicity, Mrs. Richard Overholt.

Planning committee members are Mrs. Richard Paige, Mrs. Charles Hinkle, Mrs. John Hill and Mrs. Charles Lamb.

THANKS!

The drawing of Dr. Shields Warren's testimonial dinner on the following page by artist Joseph Stern is reprinted through the courtesy of the Boston Herald. It appeared in the Herald on Feb. 27.

DR. OLIVE GATES FIRST WOMAN AWARDED CANCER GOLD MEDAL

Dr. Olive Gates, pathologist at the Cancer Research Institute, became the first woman scientist to receive the annual award of the Massachusetts Division of the American Cancer Society when she was presented a gold medal on April 1.

Her "distinguished contribution to the fight against cancer" was cited at the opening luncheon of the Cancer Crusade at the Hotel Somerset.

Dr. Gates, according to the Cancer Society, has detected as many malignant tumors through tissue examination as any other pathologist in Massachusetts and thus has been instrumental in saving many lives that might otherwise have been lost to the disease.

She has been associated for the past 25 years with the Massachusetts State Tumor Diagnosis Service and Harvard Cancer Commission.

Her study of the incidence of multiple malignant tumors with Dr. Shields Warren has earned recognition for establishing the thesis that some patients are predisposed to development of more than one cancer.

Dr. Gates recognized early the importance of the cytological test for uterine cancer first developed by Dr. George N. Papanicolaou. Through this means, a trained technician can detect cancer by microscopic examination of cells sloughed off from the affected part and its surroundings.

When the cell examination was first announced, Dr. Gates joined Dr. Herbert Lombard of the State Department of Public Health in establishing in Massachusetts the first large-scale clinical study of the new technique.

Their results were instrumental in confirming the efficacy of the technique as a diagnostic weapon against cancer.

The "Handbook for the Diagnosis of Cancer of the Uterus." of which Dr. Gates was senior author with Dr. Warren, has been published in three editions since 1947. Dr. Gates has also published many papers in professional journals on the pathology of tumors.

Her research on the experimental aspects of cancer is only part of a busy professional career. She is a consulting pathologist at the Westfield State Sanatorium and the Massachusetts State Tumor Diagnosis Service as well as a research associate in pathology at the Harvard Medical School.

Currently, Dr. Gates is studying the effects of radiation on human cancer in the cheek pouch of the hamster.

She believes that these studies will be helpful in determining and evaluating treatment of various malignant tumors.

Dr. Gates, an alumna of Yale Medical School, resides in Brookline. During the summer, she relaxes at her home in Princeton, near Leominster, where she has vacationed since childhood.

Deaconess Mourns Mrs. Helen T. Hart

Deaconess is mourning the death of Mrs. Helen T. Hart of Housekeeping, a lady who endeared herself to all who were greeted daily by her friendly smile and cheery words.

Mrs. Hart, a widow, was the mother of Miss Helen T. Hart, nurse at the Lahey Clinic who worked in surgery from 1952 to 1955 and in the nursing department from 1947 to 1949.

Mrs. Hart's devotion to the hospital and her self-acknowledged love for hard work won the respect of all. She was employed at the Deaconess from August, 1956, until her death at the hospital last March 28.

She arrived each day at 6 a. m. and was on hand to welcome the majority of employees who came to their jobs later as they passed through her first floor working areas.

She lived with her daughter on Queensbury St., Back Bay, Boston. Her friends at the Deaconess extend their sympathy to Mrs. Hart's family.
